UNITED STATES DISTRICT COURT  
DISTRICT OF OREGON  
PORTLAND DIVISION

**VOLTAGE PICTURES, LLC, et al.**

Plaintiffs,

v.

**DOE-76.105.157.206**

Defendant.

Case No.: 3:14-cv-01191-AC

PLAINTIFFS' EX PARTE MOTION TO  
EXPEDITE DISCOVERY

EXPEDITED HEARING REQUESTED

---

**PLAINTIFF'S EX PARTE MOTION TO EXPEDITE DISCOVERY**

Pursuant to Federal Rule of Civil Procedure 26 and 45, plaintiffs move the Court *ex parte* for an order permitting plaintiffs to take limited discovery to ascertain the identity of the defendant affiliated with IP address 76.105.157.206 identified in the complaint, prior to the Rule 26(f) conference for the reasons stated in the accompanying Memorandum of Law.

Plaintiffs request a hearing on this matter on an expedited basis.

**PLAINTIFF’S MEMORANDUM OF LAW IN SUPPORT OF PLAINTIFF’S EX  
PARTE MOTION TO EXPEDITE DISCOVERY**

Pursuant to Federal Rule of Civil Procedure 26 and 45, plaintiffs hereby move this Court *ex parte* for an Order permitting plaintiffs to take further limited expedited discovery prior to the Rule 26 conference to ascertain the identity of the Doe defendant affiliated with the IP address 76.105.157.206 as identified in the complaint and the attached Exhibit 1 to the complaint. Dkt. 1,1-1.

**I. INTRODUCTION**

Plaintiff Voltage Pictures, LLC, is in the business of producing marketing and distributing motion pictures, including the subject motion picture in this case titled *The Company You Keep*. Plaintiff TCYK, LLC is the registered copyright owner of the motion picture *The Company You Keep*. Defendant is a BitTorrent user, or “peer,” whose computer is interconnected with others and used for illegally copying and distributing plaintiffs’ motion picture to others. Plaintiffs are suing the Doe defendant for using the Internet, specifically the BitTorrent file distribution network, to commit copyright infringement.

As defendant used the Internet to commit infringement, plaintiff only knows defendant by his or her Internet Protocol (“IP”) address, and the time of the infringement as stated in the complaint. Defendant’s IP address was assigned by his or her Internet Service Provider (“ISP”), Comcast. Comcast uses the IP address to specifically identify each person using the Internet through Comcast to transmit and receive data similar to the address on a house, namely it is the location to which it sends data requested and from which it receives data. Publicly available data allows plaintiff to identify the specific ISP defendant used, and other information such as the city or area associated with the IP address. Publicly available data generally does not permit plaintiff to ascertain the identity of the subscriber or actual defendant. But as Comcast controls defendant’s access to the Internet, so too does Comcast have the records which tie the IP address

identified as infringing plaintiff's copyright to a specific party who contracted with Comcast for service. Without this information, plaintiff cannot ascertain the identity of the defendant nor pursue this lawsuit to protect its valuable copyrights.

Accordingly, plaintiff seeks leave to serve a Rule 45 subpoena on the ISP Comcast, as well as any related intermediaries. Such a subpoena will be limited to non-content subscriber account information such as the true name, address, telephone number, and e-mail address of the parties associated with IP address 76.105.157.206. Any such information obtained will be used for protecting and enforcing plaintiff's rights as set forth in the Complaint filed in this case.

## II. ARGUMENT

Federal Rule of Civil Procedure 26(d)(1) authorizes a court to permit discovery before the Rule 26(f) conference upon a showing of "good cause" for the party's need for expedited discovery. *See, e.g., Renaud v. Gillick*, No. 06-1304, 2004 WL 98465, at \*2-3 (W.D. Wash. Jan. 8, 2007) (analyzing the Ninth Circuit standard of "good cause" and cases permitting expedited discovery); *Semitool, Inc. v. Tokyo Electron Am., Inc.*, 280 F.R.D. 273, 276 (N.D. Cal. 2002) ("Good cause may be found where the need for expedited discovery, in consideration of the administration of justice, outweighs the prejudice to the responding party.")

Courts routinely allow discovery to identify "Doe" defendants operating through the Internet. *Voltage v. Does 1 – 371, et al.*, 3:13-cv-00295-AA (D. Or. Jun. 7, 2013) (Order releasing subpoenaed information of severed Doe #1.); *Gillespie v. Civiletti*, 629 F.2d 637, 642 (9<sup>th</sup> Cir. 1980) ("where the identity of alleged defendants [are not] known prior to the filing of a complaint . . . the plaintiff should be given an opportunity through discovery to identify the unknown defendants"); *Cottrell v. Unknown Correctional Officers, 1-10*, 230 F.3d 1366 (9th Cir. 2000); *Wakefield v.*

*Thompson*, 177 F.3d 1160, 1163 (9th Cir. 1999) (error to dismiss unnamed defendants given possibility that identity could be ascertained through discovery).

Courts consider the following factors when granting motions for expedited discovery to identify anonymous internet users: (1) whether the plaintiff can identify the missing party with sufficient specificity such that the court can determine that the defendant is a real person or entity who could be sued in federal court; (2) all previous steps taken by the plaintiff to identify the Doe defendant; and (3) whether the plaintiff's suit could withstand a motion to dismiss. *Columbia Ins. Co. v. Seescandy.com*, 185 F.R.D. 573, 578-580 (N.D. Cal. 1999)

First, it is highly likely plaintiff can identify the missing party with sufficient specificity: the missing party is either the subscriber who contracted for use of IP address 76.105.157.206, or a party likely known to the subscriber as plaintiffs have specifically identified in the complaint the significant, substantial and persistent conduct that is associated with IP address 76.105.157.206. Second, though plaintiff has been able to identify much about the defendant, namely who he or she uses as his or her ISP, where he or she is generally located, and what software he or she used to commit acts of infringement, plaintiff has no means to readily identify the Doe defendant as a named individual. Comcast has procedures for revealing the associated subscriber information, but requires a subpoena as a matter of course. Third, plaintiff states a claim for copyright infringement. Specifically, plaintiff has alleged sufficient facts to support a plausible right to relief well above any general level of mere speculation. *Bell Atlantic Corp. v. Twombly*, 550 U.S. 544 (2007).

Good cause to allow expedited discovery in this case clearly exists because the ISP used to commit the acts of copyright infringement is the only source that can supply the information necessary to identify the defendant. A further basis for good cause is that in a claim for copyright infringement there is a presumption of irreparable harm to the copyright owner. *See UMG*

*Recordings, Inc. v. Doe*, 2008 WL 4104214 (N.D. Cal. 2008) (Finding good cause for expedited discovery exists in Internet infringement cases, where a plaintiff makes a prima facie showing of infringement, there is no other way to identify the Doe defendant, and there is a risk an ISP will destroy its logs prior to the conference.)

If plaintiff is denied the ability to subpoena Comcast, the identity of the infringer will remain hidden, and defendant will be able to continue to freely infringe plaintiff's copyrights and commit other acts of theft with impunity.

As such it is clearly in the interest of preserving justice and order that this court should grant Plaintiff's motion. *Semitool, Inc.*, 280 F.R.D. at 276 ("Good cause may be found where the need for expedited discovery, in consideration of the administration of justice, outweighs the prejudice to the responding party).

### **III. EXPEDITED RELIEF IS PROPER**

As per the other activity observed associated with IP address 76.105.157.206, there is evidence the defendant is a prolific infringer that regularly and actively contributes to the BitTorrent piracy economy. From the time of detected infringement of plaintiffs' work IP address 76.105.157.206 is regularly and persistent observed associated with the BitTorrent exchange of files. Complaint, Exhibit 1; Dkt. 1-1. If the defendant is maintaining plaintiffs' work in the shared folder connected to the BitTorrent network and permitting continued access throughout this time, the number of distributions of plaintiffs' work that might be attributed to defendant would be countless. This activity is ongoing, however it is the experience of counsel that parties generally promptly terminate infringing activity and further distribution as soon as they have notice of an actual suit pending. As such, expedited relief is warranted such that

notice may be provided to the subscriber of IP address 76.105.157.206 as quickly as possible to at least limit further distribution and harm to plaintiffs.

#### **IV. CONCLUSION**

For the foregoing reasons, plaintiff respectfully requests the Court grant its *Ex Parte* Motion for Leave to Take Discovery Prior to Rule 26 Conference and enter an Order allowing plaintiff to subpoena records from Comcast for the identity of the account holder assigned to the defendant's IP address, identified as an infringing party in the complaint, and for such further information as may be needed to specifically identify the Doe defendant.

DATED: July 25, 2014.
